

NetShelter SX Advanced Enclosures

Get ready for AI workloads with even higher density racks

Taller, deeper, stronger racks designed for AI workloads and ready for rack, stack, and ship. NetShelter SX Advanced offers:

- **Uncompromised shipping protection** designed to safely load, transport, unload, and deploy a rack with IT equipment pre-installed
- **Maximized space** to build high-density AI infrastructure, accommodating large-depth servers and seamless integration of liquid cooling components
- **Higher weight loading capacity** to fit more equipment in each rack for a smaller IT footprint, reducing data center costs
