

## WebStat® Controller

### Web Accessible Thermostats

- Honeywell's WebStat® system is composed of the world-class T7350H LONWORKS® communicating thermostats combined with a single WebStat controller which enables your network of T7350H thermostats to be configured and monitored from any computer with internet access from anywhere in the world.

### Features

- Configure/commission/monitor through the same easy-to-use Web-based interface
- Free job estimating and submittal tools that provide everything from wiring diagrams to guide specs
- Data trending for use in troubleshooting
- Customizable floor plan layouts

| OS Number  | Description                                                 | Application                                                                       |
|------------|-------------------------------------------------------------|-----------------------------------------------------------------------------------|
| W7350A1000 | WebStat® Controller with LONWORKS® Loncard and Power Supply | Web-Based Network Controller                                                      |
| T7350H1009 | Communicating Commercial Programmable Thermostat            | T735H1009: 3 Heat/3 Cool or 2 Heat/4 Cool Conventional or 3 Heat/2 Cool Heat Pump |
| T7350H1017 |                                                             | T7350H1017: Two 4-20 mA Outputs for Modulating Applications                       |
